

L'Ours
For Oil & Gas Services

COMPANY PROFILE

INTRODUCTION

L'Ours is the First Local Algerian provider of a range of oilfield services from Well Testing/ Coiled tubing to Integrated Oilfield Services. We bring three core values to help our clients succeed;

Excellence in Customer Service

Focus and Service Attitude

Commitment to deliver to the highest standard

HSE awareness and Quality Service Delivery through brand new Equipment,

Team-work

Professionals in the services we provide

As a starting independent oilfield service company in Algeria, we strive to serve our clients with an unmatched expertise in the operational, technical, geological, logistical, and cultural conditions. We also bring our passionate and continuous commitment to service delivery in order to get every job done effectively, efficiently, and safely the first time all the time. We implement this with a team of international experience, new equipment, and quality-driven processes to ensure total quality. We consider every project we work on "mission critical," for our clients' success and ours.

ABOUT US

LOURS OIL SERVICES was founded in 2021 in Algeria. LOURS OIL SERVICES is a National independent oilfield service company focused on local markets. LOURS OIL SERVICES is looking at rapidly expanding in the range of the services we provide and the markets we serve. The company is starting modestly with two sets each of; Well Testing Services, Slickline Services, Multiphase Flow Meter and Coiled Tubing & Pumping Services with a clear objective: to become an outstanding oilfield services company serving the entire Middle East & North Africa region (MENA). LOURS OIL SERVICES recognizes that the key to achieving this ambitious goal is by attracting top-quality industry experts across functions and at all organizational levels to establish a culture of superior service quality and client focus from day one.

LOURS OIL SERVICES will have a reasonable size privately owned fleets of brand-new oilfield equipment in the MENA region to provide services including but not limited to Coiled Tubing Services, Surface Well Testing, DST, Multiphase Testing Services and Slickline Services. The company's employees representing Only Algerian nationalities, from experienced senior executives to seasoned field crew members, all share the same aspirations and are relevant stakeholders. Their collective commitment to excellence and their passionate engagement in each and every job will truly be our greatest strength.

MISSION

To be the client's trusted service partner of choice as a result of our proven commitment & results in delivering quality services in a safe, environmentally friendly and professional manner in the O&G industry in Algeria.

VISION

We will deliver services to our clients at the highest standards where client's needs become our objectives. We will enrich the local's knowledge wherever we operate. We will attract, motivate and retain talented people to deliver our services.

To bring significant value to our shareholders and home communities in Algeria markets through our responsible culture and hard work.

L'OURS OIL SERVICES DIFFERENCE

L'OURS OIL SERVICES seeks to provide services that are truly differentiated from those offered by all other regional services providers. We seek to do this through four key pillars:

People

Unrivaled world expertise - Training, Development and competency management to local markets

Equipment

Getting the job done efficiently, effectively the first time every time

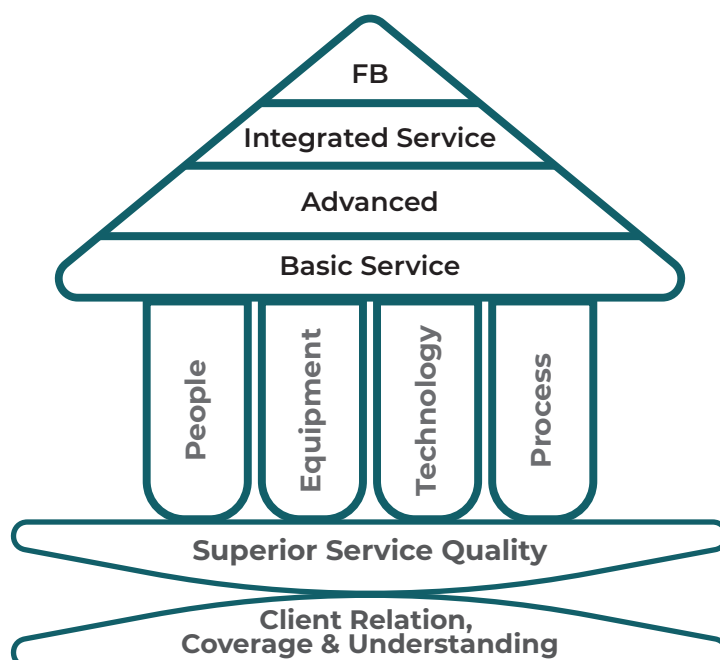

Technology

The best equipment design and world class technology

Process

Proven processes to ensure total quality

INCREASE ULTIMATE RECOVERY

Our objective is to implement engineered solutions that create more reservoir value. We'll be there every step of the way from the beginning of the oil and gas cycle.

We're the trusted partner, you can count on us. We'll be there, regardless of the location or the challenge, with products and services that enable you to drill, evaluate and produce the energy that drives the global economy. Our experts will offer services to achieve superior results.

As one of the future Local oilfield service leaders, we work with you to lower costs, reduce HS&E and economic risk, improve productivity, and increase ultimate recovery. Wherever we operate, our employees will get the job done quicker and safer. As your work becomes increasingly more demanding, we'll be there.

COILED TUBING AND PUMPING SERVICES

Achieve improvement in your well and reservoir performance through economic well stimulation and maintenance. Coiled Tubing (CT) is indispensable to many well site operations. But, the greatest value is much more than conveyance: It's the performance achieved at the end of the pipe.

LOURS OIL SERVICES CT solutions will be the result of nearly 24 years of Algerian people's experience, dedicated and focused on understanding the reservoir first. Our CT deployment teams will offer you practical solutions to help you achieve significant operational and economic performance advantages on the surface and down-hole. CT applications include matrix stimulation, wellbore cleanout, perforating, nitrogen kickoff, Reformat, Xylene, fishing & milling, well circulation and mechanical isolation.

Wellbore intervention using CT is continuously safer and more predictable, efficient, and effective.

WELL TESTING SERVICES

LOURS OIL SERVICES infrastructure provides well testing services covering:

- ✓ Exploration and appraisal testing services
- ✓ Development well clean-up and well unloading services
- ✓ Exploration and appraisal testing services

In addition to standard packages, LOURS OIL SERVICES supports its surface well testing with a dedicated engineering team to provide solutions for:

- ✓ Extended well tests
- ✓ High flow rate tests
- ✓ Limited flow tests

Rigorous quality and operating procedures mean LOURS OIL SERVICES works to provide a quality service under the strictest HSE controls. LOURS OIL SERVICES`s highly skilled and experienced personnel work to ensure the success of any test. The data acquisition system provides real-time data and can be linked to client's IT systems or the internet.

An extensive inventory of equipment is maintained covering a wide range of flow rates and pressures. Other Services:

SLICKLINE SERVICES

Reduce Nonproductive Time and Intervention Costs

Slickline services are an important tool for maintaining production on target and keeping OPEX within budget. LOURS OIL SERVICES offers an extensive range of services and a fleet of units, together with highly trained experts.

MULTI PHASE FLOW METER SERVICES

Know precisely your production Advantages using our Multiphase Flow Meters

- ✔ Continuous monitoring and metering is made possible, cost effective and more importantly makes the uncertainties lower than with conventional systems
- ✔ Real time production optimization, time warnings and corrective decisions and actions
- ✔ Readings during non-steady operating conditions
- ✔ Early water detection
- ✔ Easy transportation for mobile units

WELL HEAD MAINTENANCE SERVICES

LOURS OIL SERVICES wellhead maintenance (WHM) service forms a key part of our well integrity capability – from new HP/HT developments – through to the mature brownfield sites.

This includes:

- ✓ Routine inspection,
- ✓ Repair, and maintenance of surface wellheads
- ✓ Provision of pressure testing services

Wellhead maintenance

- ✓ Xmas tree valve greasing and valve pressure testing
- ✓ Annuli valve greasing and valve pressure testing
- ✓ Annulus integrity monitoring
- ✓ Hanger seal/pack-off testing
- ✓ Gate valve and actuator repairs
- ✓ Echo meter liquid level detection
- ✓ Surface-controlled subsurface safety valve wash (SCSSSV)
- ✓ SCSSSV inflow test and function test

PROJECT MANAGEMENT & SOLUTIONS

BUSINESS CONSULTING

LOURS OIL SERVICES Business Consulting works with companies to help organizations discover their own solutions to these challenges. We focus on the O&G sector, which faces the immediate challenges of being unusual and not easily replaceable by other forms of energy. For upstream organizations, the challenges focus on prolonging hydrocarbon supply at a reasonable cost. This requires both developing new resources, and improving recovery from existing fields.

LOURS OIL SERVICES brings skilled management consultants, experienced industry experts and where appropriate the breadth and depth of LOURS OIL SERVICES` s technical expertise to stand on these issues.

PROJECT MANAGEMENT

LOURS OIL SERVICES specializes in delivering complete projects tailored to your needs rather than individual products and services, primarily using LOURS OIL SERVICES oilfield services and products complemented by third-party services where needed.

An Integrated Services contract delivers managed LOURS OIL SERVICES, products and third parties. Integrated Services provides mainly co-ordination to clients who elect to use the majority of LOURS OIL SERVICES in performing their well operations. The Integrated Services offering does not include well engineering or well site supervision.
